25X1

In November 1953 the following craft were under construction at the Turnu Severin shipyards:

- a. Fishing vessels, estimated at 350 to 400 tons, three masts. Very high bow and diesel engine. At the stern there was a large winch with the cylinder 4 meters long and 0.3 meters in diameter. There was no chute leading to the water level. Five of these ships were completed and approximately 17 were still under construction.
- b. River barges, capacity 200 standard railroad cars, 115 meters long and 20 meters high. These barges have high superstructure which contains the upper holds.
- c. Two passenger steamers were under construction, probably for the USSR. These were similar in type to the ones under construction in the Komarno shipyards.
